Die Einstufung erfolgte nach eigenen Erfahrungen und Firmenangaben.
BBCH-Entwicklungsstadien; z.B. 09 = kurz vor dem Auflaufen, 12 = 2-Blattstadium
Symbolerklärung: ○ kein, ● mittlere bis ● sehr hohe Abhängigkeit

Herbizid-Behandlungsverfahren im Maisanbau

Spritzfolgebehandlung mit
- Vorlage von Bodenherbizid und
- Nachbehandlung mit Blattherbizid

Spritzfolgebehandlung mit
Boden- + Blattherbizid in
jeweils 50% der Gesamt-AWM

Einfachbehandlung mit
Bodenherbizid (75-100% AWM)
+ Blattherbizid (75-100% AWM)
+ Ergänzungspräparat (bei Bedarf)

AWM = zugelassene Aufwandmenge
